Plant Molecular Biology

Contents of Volume 12 (1989)

Vol. 12, No. 1

L.B. Johnson and J.D. Palmer: Heteroplasmy of chloroplast DNA in *Medicago* 3

T.H. Lubben, A.A. Gatenby, P. Ahlquist and K. Keegstra: Chloroplast import characteristics of chimeric proteins 13

B.P. Surin and J.A. Downie: *Rhizobium leguminosarum* genes required for expression and transfer of host specific nodulation 19

M.I. Boulton, W.G. Buchholz, M.S. Marks, P.G. Markham and J.W. Davies: Specificity of *Agrobacterium*-mediated delivery of maize streak virus DNA to members of the Gramineae 31

H.C. Wenzler, G.A. Mignery, L.M. Fisher and W.D. Park: Analysis of a chimeric class-I patatin-GUS gene in transgenic potato plants: high-level expression in tubers and sucrose-inducible expression in cultured leaf and stem explants 41

S. Peyachoknagul, T. Matsui, H. Shibata, S. Hara, T. Ikenaka, Y. Okada and T. Ohno: Sequence and expression of the mRNA encoding the chymotrypsin inhibitor in winged bean *(Psophocarpus tetragonolobus* (L.)DC.) 51

H.P. Spaink, C.A. Wijffelman, R.J.H. Okker and B.E.J. Lugtenberg: Localization of functional regions of the *Rhizobium nodD* product using hybrid *nodD* genes 59

L. Jouanin, D. Bouchez, R.F. Drong, D. Tepfer and J.L. Slightom: Analysis of TR-DNA/plant junctions in the genome of a *Convolvulus arvensis* clone transformed by *Agrobacterium rhizogenes* strain A4 75

N.D. Thanh and P. Medgyesy: Limited chloroplast gene transfer via recombination overcomes plastome-genome incompatibility between *Nicotiana tabacum* and *Solanum tuberosum* 87

P.D. Beremand, D.D. Elmore, K. Dziewanowska and D.J. Guerra: Expression of an active spinach acyl carrier protein-I/protein-A gene fusion 95

J. Knapp, P. Moureau, W. Schuch and D. Grierson: Organization and expression of polygalacturonase and other ripening related genes in Ailsa Craig "Neverripe" and "Ripening inhibitor" tomato mutants 105

Plant Molecular Biology Update

R.J. Rahmatullah, J.-K. Huang, K.L. Clark, G.R. Reeck, G. Ram Chandra and S. Muthukrishnan: Nucleotide and predicted amino acid sequences of two different genes for high-pI α-amylases from barley 119

Vol. 12, No. 2

T. Masumura, D. Shibata, T. Hibino, T. Kato, K. Kawabe, G. Takeba, K. Tanaka and S. Fujii: cDNA cloning of an mRNA encoding a sulfur-rich 10 kDa prolamin polypeptide in rice seeds 123

B. Ricard, J. Rivoal and A. Pradet: Rice cytosolic glyceraldehyde 3-phosphate dehydrogenase contains two subunits differentially regulated by anaerobiosis 131

A.N. Webber, S.M. Hird, L.C. Packman, T.A. Dyer and J.C. Gray: A photosystem II polypeptide is encoded by an open reading frame cotranscribed with genes for cytochrome *b*-559 in wheat chloroplast DNA 141

J.A.L. Van Kan, M.D. Van de Rhee, D. Zuidema, B.J.C. Cornelissen and J.F. Bol: Structure of tobacco genes encoding thaumatin-like proteins 153
T. Gloudemans, T.V. Bhuvaneswari, M. Moerman, T. Van Brussel, A. Van Kammen and T. Bisseling: Involvement of *Rhizobium leguminosarum* nodulation genes in gene expression in pea root hairs 157
A. Mitra, H.K. Choi and G. An: Structural and functional analyses of *Arabidopsis thaliana* chlorophyll a/b-binding protein (*cab*) promoters 169
D. Gerhold, G. Stacey and A. Kondorosi: Use of a promoter-specific probe to identify two loci from the *Rhizobium meliloti* nodulation regulon 181
F. Köhler, G. Cardon, M. Pöhlman, R. Gill and O. Schieder: Enhancement of transformation rates in higher plants by low-dose irradiation: are DNA repair systems involved in the incorporation of exogenous DNA into the plant genome? 189
C. Bisanz-Seyer, Y.-F. Li, P. Seyer and R. Mache: The components of the plastid ribosome are not accumulated synchronously during the early development of spinach plants 201
R.E. Koes, C.E. Spelt and J.N.M. Mol: The chalcone synthase multigene family of *Petunia hybrida* (V30): differential, light-regulated expression during flower development and UV light induction 213
I. E. Somssich, J. Bollmann, K. Hahlbrock, E. Kombrink and W. Schulz: Differential early activation of defense-related genes in elicitor-treated parsley cells 227
H. Hirano, Y. Komeda and T. Iino: Cloning and structural analysis of the snap-back DNA of *Pharbitis nil* 235

Vol. 12, No. 3

R. T. DeRose, D.-P. Ma, I.-S. Kwon, S. E. Hasnain, R. C. Klassy and T. C. Hall: Characterization of the kafirin gene family from sorghum reveals extensive homology with zein from maize 245
E. Pichersky, T. G. Brock, D. Nguyen, N. E. Hoffman, B. Piechulla, S. D. Tanksley and B. R. Green: A new member of the CAB gene family: structure, expression and chromosomal location of *Cab*-8, the tomato gene encoding the Type III chlorophyll a/b-binding polypeptide of photosystem I 257
B. Huss, G. Bonnard and L. Otten: Isolation and functional analysis of a set of auxin genes with low root-inducing activity from an *Agrobacterium tumefaciens* biotype III strain 271
K. Jakobsen, S. S. Klemsdal, R. B. Aalen, M. Bosnes, D. Alexander and O.-A. Olsen: Barley aleurone cell development: molecular cloning of aleurone-specific cDNAs from immature grains 285
K.-I. Tomizawa, N. Sato and M. Furuya: Phytochrome control of multiple transcripts of the phytochrome gene in *Pisum sativum* 295
H. Pfitzinger, J. H. Weil, D. T. N. Pillay and P. Guillemaut: Preparation of a tRNA-dependent wheat germ protein-synthesizing system 301
R. B. Mellor, C. Garbers and D. Werner: Peribacteroid membrane nodulin gene induction by *Bradyrhizobium japonicum* mutants 307
B. Piechulla: Changes of the diurnal and circadian (endogenous) mRNA oscillations of the chlorophyll a/b binding protein in tomato leaves during altered day/night (light/dark) regimes 317
R. G. F. Visser, E. Jacobsen, A. Hesseling-Meinders, M. J. Schans, B. Witholt and W. J. Feenstra: Transformation of homozygous diploid potato with an *Agrobacterium tumefaciens* binary vector system by adventitious shoot regeneration on leaf and stem segments 329

Plant Molecular Biology Update

R. A. J. Van Daelen, J. J. Jonkers and P. Zabel: Preparation of megabase-sized tomato DNA and separation of large restriction fragments by field inversion gel electrophoresis (FIGE) 341

Aims and Scope/Instructions to Authors 353

Vol. 12, No. 4

R.J. Ferl and B.H Laughner: *In vivo* detection of regulatory factor binding sites of *Arabidopsis thaliana Adh* 357
C.L. Cramer, K. Edwards, M. Dron, X. Liang, S.L. Dildine, G.P. Bolwell, R.A. Dixon, C.J. Lamb and W. Schuch: Phenylalanine ammonia-lyase gene organization and structure 367
X.-Q. Liu, J.P. Hosler, J.E. Boynton and N.W. Gillham: mRNAs for two ribosomal proteins are preferentially translated in the chloroplast of *Chlamydomonas reinhardtii* under conditions of reduced protein synthesis 385
J.J. Harada, A.J. DeLisle, C.S. Baden and M.L. Crouch: Unusual sequence of an abscisic acid-inducible mRNA which accumulates late in *Brassica napus* seed development 395
M. Swegle, J.-K. Huang, G. Lee and S. Muthukrishnan: Identification of an endochitinase cDNA clone from barley aleurone cells 403
M. Klaas, M.C. John, D.N. Crowell and R.M. Amasino: Rapid induction of genomic demethylation and T-DNA gene expression in plant cells by 5-azacytosine derivatives 413
B.M. Parks, J. Shanklin, M. Koornneef, R.E. Kendrick and P.H. Quail: Immunochemically detectable phytochrome is present at normal levels but is photochemically nonfunctional in the *hy 1* and *hy 2* long hypocotyl mutants of *Arabidopsis* 425
R. Wales, B.J. Newman, D. Pappin and J.C. Gray: The extrinsic 33 kDa polypeptide of the oxygen-evolving complex of photosystem II is a putative calcium-binding protein and is encoded by a multi-gene family in pea 439
Z. Olah, L. Bogre, C. Lehel, A. Farago, J. Seprodi and D. Dudits: The phosphorylation site of Ca^{2+}-dependent protein kinase from alfalfa 453
L.-G. Franzén, G. Frank, H. Zuber and J.-D. Rochaix: Isolation and characterization of cDNA clones encoding the 17.9 and 8.1 kDa subunits of Photosystem I from *Chlamydomonas reinhardtii* 463

Vol. 12, No. 5

L. Dure III, M. Crouch, J. Harada, T-H.D. Ho, J. Mundy, R. Quatrano, T. Thomas and Z.R. Sung: Common amino acid sequence domains among the LEA proteins of higher plants 475
E. Delhaize, N.J. Robinson and P.J. Jackson: Effects of cadmium on gene expression in cadmium-tolerant and cadmium-sensitive *Datura innoxia* cells 487
H. Fromm, E. Galun and M. Edelman: A novel site for streptomycin resistance in the "530 loop" of chloroplast 16S ribosomal RNA 499
T.T. Eckdahl, J.L. Bennetzen and J.N. Anderson: DNA structures associated with autonomously replicating sequences from plants 507
B.A. McClure and T.J. Guilfoyle: Tissue print hybridization. A simple technique for detecting organ- and tissue-specific gene expression 517
M.R. Olive, R.J. Ellis and W.W. Schuch: Isolation and nucleotide sequences of cDNA clones encoding ADP-glucose pyrophosphorylase polypeptides from wheat leaf and endosperm 525
A.J. Van Tunen, S.A. Hartman, L.A. Mur and J.N.M. Mol: Regulation of chalcone flavanone isomerase (CHI) gene expression in *Petunia hybrida*: the use of alternative promoters in corolla, anthers and pollen 539
M.J. Bennett, D.A. Lightfoot and J.V. Cullimore: cDNA sequence and differential expression of the gene encoding the glutamine synthetase γ polypeptide of *Phaseolus vulgaris* L. 553
R. Furter and B.D. Hall: Specific transcription and reinitiation of class III genes in wheat embryo nuclei and chromatin 567

R.L. Hudspeth and J.W. Grula: Structure and expression of the maize gene encoding the phosphoenolpyruvate carboxylase isozyme involved in C_4 photosynthesis 579
M.H. Vodkin and L.O. Vodkin: A conserved zinc finger domain in higher plants 593
G. Payne, W. Middlesteadt, N. Desai, S. Williams, S. Dincher, M. Carnes and J. Ryals: Isolation and sequence of a genomic clone encoding the basic form of pathogenesis-related protein 1 from *Nicotiana tabacum* 595
H. Vaucheret, J. Kronenberger, P. Rouzé and M. Caboche: Complete nucleotide sequence of the two homeologous tobacco nitrate reductase genes 597

Vol. 12, No. 6

H. Fukata, K. Ohgami and H. Fukasawa: Assembly of nucleosome-like structures mediated by cauliflower DNA topoisomerase 601
T.K. Prasad and R.L. Hallberg: Identification and metabolic characterization of the *Zea mays* mitochondrial homolog of the *Escherichia coli* groEL protein 609
A.H. Christensen and P.H. Quail: Sequence analysis and transcriptional regulation by heat shock of polyubiquitin transcripts from maize 619
M.A. Johns, M.S. Babcock, S.M. Fuerstenberg, S.I. Fuerstenberg, M. Freeling and R.B. Simpson: An unusually compact retrotransposon in maize 633
P. Schweizer, W. Hunziker and E. Mösinger: cDNA cloning, *in vitro* transcription and partial sequence analysis of mRNAs from winter wheat (*Triticum aestivum* L.) with induced resistance to *Erysiphe graminis* f. sp. *tritici* 643
D.I. Last and J.C. Gray: Plastocyanin is encoded by a single-copy gene in the pea haploid genome 655
H. Böhme and R. Haselkorn: Expression of *Anabaena* ferredoxin genes in *Escherichia coli* 667
R. Leah and J. Mundy: The bifunctional α-amylase/subtilisin inhibitor of barley: nucleotide sequence and patterns of seed-specific expression 673
S.P. Mayfield, M. Schirmer-Rahire, G. Frank, H. Zuber and J.-D. Rochaix: Analysis of the genes of the OEE1 and OEE3 proteins of the photosystem II complex from *Chlamydomonas reinhardtii* 683
F. Grellet, D. Delcasso-Tremousaygue and M. Delseny: Isolation and characterization of an unusual repeated sequence from the ribosomal intergenic spacer of the crucifer *Sisymbrium irio* 695

Plant Molecular Biology Update

T. Kiss, S. Abel and F. Solymosy: A plant pseudogene for U1 RNA 709
M.C. Metzler, B.A. Rothermel and T. Nelson: Maize NADP-malate dehydrogenase: cDNA cloning, sequence, and mRNA characterization 713
T. Masumura, K. Kidzu, Y. Sugiyama, N. Mitsukawa, T. Hibino, K. Tanaka and S. Fujii: Nucleotide sequence of a cDNA encoding a major rice glutelin 723

Contents of Volume 12 (1989) 727
Author Index, Vol. 12 (1989) 731
Aims and Scope/Instructions to Authors 733
